## **DETAILED ACTION**

This action is a supplemental action to the Letter mailed July 14, 1996 indicating all claims being allowable and a potential interference. After reconsideration the indicated allowability of claim is withdrawn in view of the new grounds of rejection. Therefore rejections based on 35 U.S.C. 112 follow.

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of 37 CFR 1.71(a)-(b):

- (a) The specification must include a written description of the invention or discovery and of the manner and process of making and using the same, and is required to be in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which the invention or discovery appertains, or with which it is most nearly connected, to make and use the same.
- (b) The specification must set forth the precise invention for which a patent is solicited, in such manner as to distinguish it from other inventions and from what is old. It must describe completely a specific embodiment of the process, machine, manufacture, composition of matter or improvement invented, and must explain the mode of operation or principle whenever applicable. The best mode contemplated by the inventor of carrying out his invention must be set forth.

The specification is objected to under 37 CFR 1.71 because there is no support in the specification for failing to provide adequate written description of the invention. For instance, the recitation, i.e., in claim 95 "plug means for plugging said puncture being disposed at said distal end of said elongated member" (emphasis added).

Application/Control Number: 08/399,535

Art Unit: 3731

2. Claims 95-102 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Independent claims 95 and 102 have recitation unsupported in specification. Claims

96-101 depend from claim 95. See the objection to the specification above. Nowhere in the

specification is it disclosed that the plug means is disposed at the distal end of the elongated

member. The plug is disposed at the distal end only during the process of inserting the plug into

the puncture. Even if the specification did recite this feature, such would be an intermediate step

in a process and not initial configuration of the device. Applicant could not leave out the essential

configuration of having the plug inserted from the proximal end before it is at the distal end of the

shaft. Therefore the recitation is unsupported in the specification.

- 3. Claims 103-104 are allowable over the art of record.
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Jackson whose telephone number is (703) 308-4302. The examiner can normally be reached Monday-Thursday from 7:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Buiz, can be reached on (703) 308-0871. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-2708.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
